EDITORIAL NOTICE

Contributors of perturbed orbital elements are advised that use of the Epoch 2002 May 6.0 TT (rather than 2001 Oct. 18.0 TT) will become effective *after* the next batch of MPCs.

The Minor Planet Center acknowledges with thanks the receipt of donations this past month from R. Covington (North Carolina), M. Griesser (Switzerland) and L. K. Sloan (California). Donations, which are tax deductible (in the U.S.), can be sent (with an indication they are for the Minor Planet Center) to Amanda Preston, Development Officer, Smithsonian Astrophysical Observatory, Mail Stop 31, 60 Garden Street, Cambridge, MA 02138, U.S.A. (telephone +1-617-495-7321, FAX +1-617-384-7689, e-mail apreston@cfa.harvard.edu).

NEW OBSERVATORY CODES

The following listing is a continuation to that on MPC 44163. The longitudes λ are measured in degrees eastward from Greenwich, and the parallax constants $\rho \cos \phi'$ and $\rho \sin \phi'$ are the product of the geocentric distance (in earth equatorial radii) and the cosine and sine, respectively, of the geocentric latitude.

OBSERVATIONS OF MINOR PLANETS

The summary lists, for each observatory code, the designation of each object observed (an asterisk signifying a new discovery), with three numbers indicating the number of observations, the number of different nights on which the object was observed and the arc (in days) covered by the observations; at the end of each observatory listing there is a count of the total number of observations, of the number of objects and of the number of discoveries followed by an asterisk, together with the total range of dates covered by the observations.

SUMMARY OF NEW NUMBERINGS

The following summary of new numberings of minor planets lists for each object the number, principal provisional designation, date of discovery, observatory code of the discovery site and the names of the discoverers. A separate table lists orbital elements and absolute magnitudes (the slope parameter *G* being 0.15 in every case). Further details, including additional identifications and residuals, are given in the *Minor Planet Circulars Orbit Supplement*.
